

Progress on DOT&PF Recovery from 2020 Storm

DOT&PF Juneau Projects

Design work on DOT&PF Juneau storm-damaged sites has continued in the last few months. Permanent repair construction on Juneau sites is expected in 2022 and 2023. Progress highlights since January 2022 include:

- Design on the Thane Road site is wrapping up. DOT&PF is coordinating with FEMA on project funding. The project is expected to advertise in May and begin in June or July. During construction, access to driveways will be maintained and one lane of traffic will be open at most times. Construction will last about a month.
- Repairs on the damage site on North Douglas Highway near Bonnie Brae are starting final design. Field work associated with the site will occur this spring, and construction is scheduled for fall 2022.
- Design is progressing on culvert repairs on Glacier Highway and on several other permanent roadway, catchment basin, and culvert repairs around Juneau.

DOT&PF Regionwide Program

DOT&PF is delivering permanent repairs to damage sites in 5 Southeast Alaska communities. Emergency repairs are completed on all sites, and designs for permanent repairs are progressing. All permanent repairs will be completed by the end of 2023.
