

Progress on DOT&PF Recovery from 2020 Storm

DOT&PF Petersburg Projects

Design on DOT&PF's Petersburg storm-damaged sites has continued in the last few months. Permanent repair construction on Petersburg sites is expected in 2022 and 2023.

DOT&PF has accelerated a permanent repair project to fix a culvert at Mitkof Highway milepoint (MPt) 10.8. The project is in final design, and it will advertise this spring. Construction will be completed by the end of summer 2022.

Two additional culverts at Mitkof Highway at MPt 2.6 and 15.5 will be designed as part of another permanent repair project later in 2022.
